# History and Activity

The company was established in the year 2007.

During its activity at Slovak as well as foreign markets it was able to win recognition as a company in a position of serious partner for investors, business partners, a fully respected competing business.

The Company is built on a solid foundation with a prerequisite for further high-quality professional development at professional level.

The Company deals with building activities and its main activity are iron-concrete work, laying concrete steel, bridges, motorways, roads as well as construction of monoliths on the Slovak and as well in the foreign markets.

In accordance with the requirements of our partners we created a rich database of potential employees to make good selection of employees for various construction works.

The main attributes of our Company are satisfaction of our business partners along with satisfaction of our employees.

# The goal of the company

- to be economically strong, stable and fully competitive company with a fixed place among prospering companies on the Slovak market
- to consolidate its position as a trusted and reliable business partner meeting his obligations
- harmonious, balanced and sustainable development of all areas of activity which leads to growth of the company evaluation, employees and customers satisfaction respecting simultaneously natural and economic, social and cultural conditions
- placing the emphasis on a construction as the source of profit on the basis of supporting activities of the company
- to promote its activities as well as professional skills, where appropriate, in other countries of the EU
- to continue in supplying realization of important works in the sphere of construction industry in all its segments
